366-3340

### Call First!!!

For hours of operation and any recycling fees.

### Tips

On the bottom of plastic products there is a recycling number in the recycling chasing arrows. Put in drop-off trailers according to #1 or #2

## But What About ... ?

### Dumping Options

**Suburban Recycling and Disposal Facility** 740-787-2327  
State Route 668 South

**Fallsburg Road Landfill** - construction and demolition waste recycling  
322-5733 Located at 7271 Fallsburg Rd./ State Route 79 North

### Common Household Hazardous Waste

**Gasoline** (old) may be strained through a paper filter and diluted with fresh gasoline by one half. This mixture may sometimes be used in your lawnmower, but be sure to check the owners' manual.

**Latex and oil paint** can be disposed of safely in three ways:

1. Use it up. If you don't have very much paint, spread it on cardboard or newspaper. Let it dry and discard it with your regular trash.
2. If you have a half a can or less of paint, open the can and let it dry out in a well-ventilated area. Keep it away from an open-flame, rain, children or pets. To speed the drying process, add equal amounts of absorbent material, such as kitty litter or a product called Paint Hardener. When completely dried out, discard with your regular trash.
3. Full or nearly full cans of usable paint can usually be donated. Try contacting local churches, housing programs, or school art, local theater or drama departments.

### Paper Recycling

**Abitibi-Bowater** is the largest paper recycling company in the world. Abitibi-Bowater has put many Paper Retriever containers at local schools. To find out if there is a trailer close to you check out their website at [www.paperretriever.com](http://www.paperretriever.com). Abitibi-Bowater recycles office paper, magazines, newspapers, phone books and mail. They DO NOT take phone books.

## What Are Other Ways To Recycle

### Composting

Composting returns organic material to the soil in a usable form. Organic matter in the soil improves plant growth.

Two easy ways to make compost:

1. Leave your grass clippings on your yard after mowing. This helps your soil.
2. Recycle your kitchen waste (do not use meat or dairy products), newspapers, sawdust and yard waste. Put the material in a bin with enough dirt to cover. You must keep the waste moist and turn occasional. Use the compost on your garden, around your trees and shrubs for better plant growth. To learn more about composting check out the following websites;  
[ohioline.ag.ohio-state.edu](http://ohioline.ag.ohio-state.edu) and <http://home.howstuffworks.com>
3. If you do not have room for composting, you can take your materials to local composting businesses such as the Compost Farm or Elm Recycling.

### Annual recycling events

Tire Recycling – Spring

Appliance Recycling – Spring

Christmas Chipper Tree - Winter

Household Hazardous Waste Collection-Held biannual. Call for more information 670-5125 or 349-6308
